BALLOON SPLASH

Assembly Instructions

1. Select a level area to operate game with plenty of room to allow for a line to form.
2. Assemble framework, per *Frame Set-up picture*. (Be sure to tighten down the fittings using the small bolts on them.)
3. Attach canvas to the framework using the Velcro straps. [**NOTE:** Your canvas is powdered to prevent it from sticking together during shipment. Simply remove powder with a dry cloth.]
4. If using game outdoors, it is strongly suggested that you use the stakes provided on either side of the bottom supports. Use sandbags on pavement. And in a breeze, use sandbags with the stakes.
5. Screw on the target.
6. Place the harness with the balloon on the pipe to the left (when facing unit). Be sure the needle lines up with the balloon.
7. The *Splash Bombs* are meant to be thrown wet. Keep a bucket of water nearby to soak them in.
8. **Use only helium balloons.**
9. If using indoors, purchase a small wading pool to contain the water.

CANVAS CARE

1. NEVER store game with the safety cork off the needle, as it will slice the canvas and could be dangerous.
 2. If game becomes wet, dry thoroughly before storing.
 3. Fold the canvas INWARD to help protect and keep it clean.
 4. Canvas can be cleaned with mild soap when necessary.
