

Safety Chain Kit

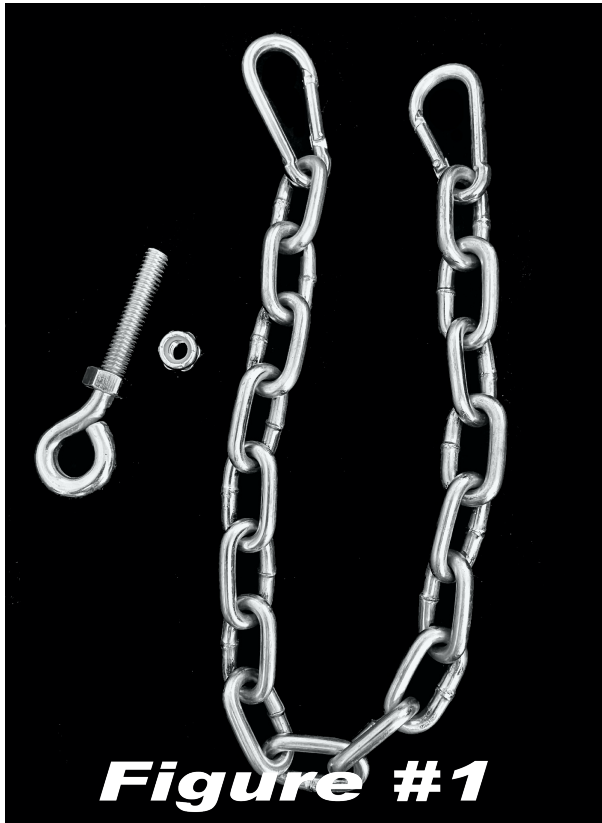

Figure #1

Safety Chain Kit includes: the chain, two clips, an eye-bolt and two nylon nuts.

- Drill a 5/16" hole through the Canvas support arm as shown in *Figure 2*.
- Place one nut on the eye-bolt at the top of the thread.
- Insert eye-bolt through the arm as shown in *Figure 3* and tighten in place with the second nut.
- Attach safety chain to the eye-bolt. (See *Figure #4*.)
- Anytime the dunk tank is being transported, this chain should be attached, with one end connected to the eye-bolt, and the other connected to the dunk tank frame. (See *Figure #5*.)

Figure #2

The safety chain is important for preventing the arm from coming loose during transportation.
